Summary

Backend-focused full stack developer (Java/Spring Boot, Node.js) and Software Developer Apprentice at Commonwealth Bank of Australia, building secured REST services (JWT, RBAC) with 85% JUnit coverage. B.E. CSE student (CGPA 9.44), first place among 19 teams in an IoT competition, published author (IJSREM).

Technical Skills

Languages	Java, JavaScript, TypeScript, Python, SQL
Backend	Spring Boot, Spring Security, Spring Data JPA, JWT, RBAC, REST, Node.js, Express.js, FastAPI
Frontend	React.js, React Native
Databases	MySQL, PostgreSQL, MongoDB
Tools	Git, GitHub, Amazon Web Services, Maven, JUnit, Postman, Docker
Deployment	Render, Vercel, Expo EAS Build
Core CS	Data Structures and Algorithms, OOP, DBMS, Operating Systems

Experience

Software Developer Apprentice Jul 2026 – Present
Commonwealth Bank of Australia (CBA) *Bengaluru, India*

- Led a six-engineer team to deliver the Digital Marketplace, a MERN multi-vendor prototype (customer, seller, admin roles), on schedule for CBA stakeholders in a 1.5-week cycle (Sep 10–18, 2026), live on Render (GitHub | Live Demo).
- Own the backend: 31 REST routes across 8 route files and 6 collections, with a 5-state order lifecycle supporting seller approval, catalog creation, cart checkout and automated inventory deduction.
- Resolved schema divergence across six parallel branches (ObjectId vs string keys) with dual-compatibility Mongoose `pre("save")` hooks and query parsing; built RBAC middleware that blocks unapproved sellers and instantly invalidates blocked users' sessions.
- Ran a Git workflow (feature branches → integration → main) with daily milestone syncs; monitored the API with `morgan` latency logs and MongoDB aggregation counters; fixed Render CORS and seller order-scoping bugs.

Java and Spring Boot Virtual Intern Jun 2026 – Aug 2026
Infosys Springboard Virtual Internship 7.0 (concurrent) *Remote*

- Completed an 8-week Spring Boot, Spring Security (JWT, RBAC) and JUnit program, applied in PropLens; earned the certificate.

Projects

PropLens: Real Estate Due Diligence | *Java 21, Spring Boot 3, Spring Security, JWT* GitHub | Live Demo

- Property due-diligence platform for buyers and investors: designed and secured 42 REST endpoints with JWT authentication and role-based access control; wrote 40+ JUnit tests reaching 85% coverage.
- Built the JWT security layer, address validation, and the report service that combines dispute history, flood-zone ratings and comparable valuations into a composite risk score.

FireWatch: IoT Fire Detection | *Node.js, ESP32, Arduino, JavaScript* GitHub

- Built a full-stack IoT prototype: an ESP32 flame sensor with 3-sample debounce posts to a Node.js server, which streams to a live dashboard (SSE) and Telegram alerts in 1.2 seconds on average; a local buzzer works if Wi-Fi drops.
- Won first place among 19 teams in the "IoT in Action" competition at Don Bosco Institute of Technology.

CampusBunk: Attendance Tracker | *React Native, Expo, TypeScript* GitHub

- Built a 4-screen Android app (APK via Expo EAS Build) with per-subject attendance thresholds (default 75%) and one-tap daily logging, to avoid exam debarment from attendance shortfalls.
- Wrote the engine for classes safe to skip, classes needed to recover, and what-if semester projections.

Leadership

Team Leader, Smart India Hackathon 2025 – 2026
Two editions (2025 and 2026), shortlisted both times

- SIH 2025: led a six-member team to build a gamified learning platform for rural areas (GitHub).
- SIH 2026: led a six-member team to build SkyGuard AI (React, FastAPI, SQLite), a weather-station monitor with a physics-rule engine, drift detection and explainable fault diagnostics (GitHub).

Education, Certifications and Publication

Don Bosco Institute of Technology (VTU) 2023 – 2027
B.E. in Computer Science and Engineering *CGPA: 9.44/10*
Class XII (CBSE): 76.4%, 2022 | Class X (CBSE): 89.4%, 2020

Certifications: RDBMS PostgreSQL, IIT Bombay (2025); DSA Using Java, Infosys Springboard (2026)
Publication: "Project Management System Using CPM and PERT," IJSREM, May 2026 (DOI:10.55041/IJSREM63803)
